Subject: Sampling Equipment - URGENT

Glenn,

1. Did you ever order that part for the slam bar? Is the slam bar functional? Did you get the inner tubes for it? How many do we have?
2. We need to see what is available 'out there' for renting a groundwater well pump unit and soil sampling equipment either hand held unit or a small truck mounted drill rig.

Please get together all your files, catalogs and information for sampling equipment and let's go through them. As you already know there is not much time to get what we need so everything from here on out is ASAP and URGENT when it pertains to the upcoming sampling event in Santo Domingo.

Thanks, Linda
